

Take your institution's open source skills to the next level with Adopt an Academy

Red Hat Academy

What is Adopt an Academy?

Adopt an Academy is a program where interested Red Hat Associates can engage with a Red Hat® Academy on a regular basis, leveraging their industry experience and technical expertise to ultimately better enable instructors and students across academic institutions in their communities. Red Hatters' participation can range from leading guest lectures, joining advisory boards, hosting technical workshops, and even providing student mentorship.

The ultimate goal of this program is to help drive further adoption of Red Hat technologies and bring our content to life for your students. We want academies to be aware that this is available to them and communicate the benefits of the program.

Why should my institution be a part of this program?

Teach students about open source technologies from Red Hat Associates and skilled professionals who have hands-on, industry experience.

Equip younger generations with in-demand skills in order to encourage open source learning and knowledge of Red Hat technology.

Bring practical curriculum applications to life by providing real world examples of how the content they are learning in the classroom can be applied in their future careers.

Build connections with industry professionals for future job opportunities for students.

Offer additional motivation and guidance to students who are looking for industry demanded learning.

Have the voice of industry help direct their academic programs based on the most updated and relevant skill sets.

Introduce new emerging technologies to students beyond those concepts covered in class.

93%

of hiring managers report difficulty finding sufficient talent with open source skills, up from 87% two years ago.

Linux Foundation. "2020 Open Source Jobs Report," 2020

How does our academy participate?

Each affiliated Red Hat Academy must participate in at least one event per semester in order to maintain their status in the Adopt an Academy program. Examples of events include:

- + Host events on campus or virtually
- + Create coding or quiz contests that challenge students' open source knowledge with real-world applications
- + Invite the Red Hat Associate affiliated with your institution to host a presentation or talk with your class about Red Hat technologies, emerging technologies, IT skills needed to succeed, and more

How does my institution apply for Adopt an Academy?

Your designated Academy Administrator will log into his or her Red Hat Academy Learning Platform account and express interest under the "Manage Academy Instructors" tab.

For those who have not accessed the Red Hat Academy Learning Platform yet, reach out to your Red Hat Academy contact.

"Red Hat Academy at APSIT India is a collaborative effort between APSIT and Red Hat to impart the skills leading to the global certifications in the areas of System Administration, Middleware Development and Microservices. Under the Adopt An Academy program, we organized a couple of sessions in June-20 on Red Hat Enterprise Application Development and OpenShift Container Platform. During these sessions, the Red Hat consultants shared their industry experience and technical expertise which increased the awareness and knowledge about Red Hat Linux, Application Development and OpenShift among the students. These sessions were attended by 155 students with positive interaction and response. Now the students are looking forward to more such informative and interesting sessions in future."
